

## Starr Labs Ztar babyZ USB/ MIDI Guitar controller

The Baby-Z is a small, portable yet powerful, USB-MIDI guitar controller that allows a guitarist to enter a performance into their synthesizer, computer, or DAW. The babyZ contains all of the performance features of the higher-end zTar MIDI controllers, but it is scaled down for compactness and affordability.

### Features:

- 16 Fret Fingerboard. Touch-sensitive rubber strings offer a smooth linear feel similar to real strings.
- 6 programmable Expression Pads
- Octave Up and Down Buttons
- 8 programmable Rotary Pots
- Encoder Wheel User Interface
- 6 Touch-sensitive rubber Trigger Bars for fingerstyle performance.
- Programmable Ribbon Controller
- Sustain Pedal Jack
- Volume Pedal Jack
- MIDI IN, MIDI OUT
- Internal MIDI Wireless optional
- Programmable User Interface
- Weight 4 pounds
- Dimensions: 26" L x 5.5" W
- Power: 9VoltsDC Phantom power or USB 2.0 compatible port.
- 33 user presets
- On-Board Arpeggiator
- On-Board chording system
- 50,000 note sequencer
